The tobacco plant may be grown a great variety of soils, but the commercial value of the product is influ-in December in South America, Ausenced to a greater degree by the particular soil and climatic conditions under which the plant is grown than is almost any other important crop. These facts are so well recognized that the tobacco industry has become highy specialized, and the trade regularly looks to certain well-defined areas of production for its supply of the varius classes and types of leaf required. In these tobacco-producing districts the necessary facilities for marketing are available, and prevailing prices of the cured leaf are governed largely by the relative supply and demand and by the quality of the leaf produced. Increased Production.

Each important district produces a tobacco of certain well-known characteristics which make it desirable for special purposes of manufacture or export. Moreover, in practically all of which you have not seemed to think study to Mary Pickford, Louise Du Pre these districts the production can be of, Mr. Gobbler," said little Brown has entered stardom in the "movie" readily increased to meet any in Hen, who had listened quietly all the world.
